CREATOR LAUNCH KIT

Gifted first

Paid on request

Available now on Mac App Store

Your AirPods know when you *slouch*.

SitTall - Fix Your Posture is a posture reminder for Mac that uses supported AirPods motion sensors to detect posture drift and send gentle nudges from the menu bar. No camera. No account. No cloud.

AirPods-based

Privacy-first

Works offline

On-device only

Primary creator ask

Try SitTall - Fix Your Posture, create launch content around a real desk-work moment, and highlight the privacy-first difference versus camera-based posture tools.

Hero product view

The UI explains the product quickly: menu bar native, gentle alerting, and easy-to-understand posture states.

SitTall - Fix Your Posture

MECHANISM, TRUST,
AND COMPATIBILITY

— WHY IT WORKS

Built for people who spend long hours at a desk and stop noticing posture drift.

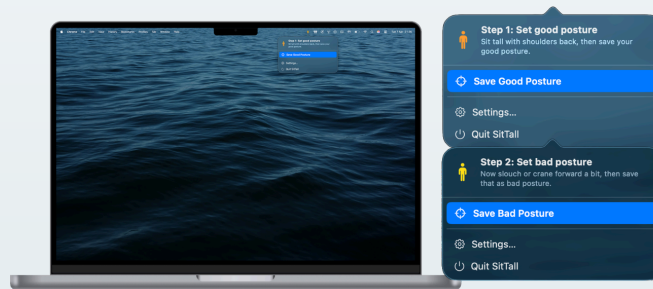

SitTall - Fix Your Posture works because it notices posture change when it actually happens. Instead of using a timer or a webcam, it reads head motion from supported AirPods and triggers a local reminder only when your posture drifts past your baseline.

Product story

- Desk posture usually slips during focused work, not when someone is actively thinking about it.
- Camera-based tools introduce privacy concerns and visible setup friction.
- Timer-based nudges interrupt on schedule rather than on real posture change.
- SitTall - Fix Your Posture fits naturally into a Mac workflow and feels lightweight enough to leave running.

How it works

- 1 Connect supported AirPods to a Mac running macOS 14 or later.
- 2 Capture good posture and bad posture once during calibration.
- 3 Let SitTall - Fix Your Posture monitor silently from the menu bar while you work.
- 4 Receive a local reminder when posture drift persists past your threshold.

Quick setup

Calibration is easy to show on-screen and helps creators explain why the app feels personal rather than generic.

Core differentiators

Privacy

Mac app: no camera, no account, no analytics, no network requests.

Compatibility

Apple Silicon Mac with macOS 14+ and AirPods 3rd generation, AirPods 4, AirPods 4 with Active Noise Cancellation, AirPods Pro all models, AirPods Max, or Beats Fit Pro.

Format

Menu bar app, local notifications, processed entirely on-device.

SitTall - Fix Your Posture

AUDIENCE, HOOKS,
AND CREATOR FIT

CREATOR FIT

Best for creators already showing a Mac, a desk setup, or a workday routine.

SitTall - Fix Your Posture fits naturally into productivity, desk setup, Mac workflow, remote work, tech-lifestyle, and wellness-at-work content. The strongest concepts are honest, simple, and easy to understand in under ten seconds.

Best content angles

- “Your AirPods know when you slouch.”
- “This posture reminder for Mac doesn’t use a camera.”
- “Small menu bar app, surprisingly useful desk habit.”
- “A privacy-first posture reminder for people already living in AirPods.”

Recommended creator flow

- 1 Open on the desk-work posture problem.
- 2 Show the calibration or menu bar setup.
- 3 Show the alert moment and reset.
- 4 Land on no camera, no account, Mac App Store.

Offer positioning

The outreach default is **gifted first**. Creators can try SitTall - Fix Your Posture before committing to anything bigger. If a creator has a strong concept or wants broader usage, paid collaboration can be discussed on request over email.

Safe messaging

Say

Posture reminder, posture awareness, gentle nudge, no camera, works offline, on-device.

Avoid

Medical treatment claims, guaranteed pain relief, or broad AirPods compatibility claims.

Ideal payoff visual

The notification is the easiest proof point for creators: simple, local, and easy to understand without overexplaining.

SiTall - Fix Your Posture

FAQ, LINKS,
AND CONTACT

FAQ & CONTACT

A clean, creator-friendly product story with enough specificity to send immediately.

This version is optimized for a sendable PDF: direct product framing, clear compatibility details, and a simple way for creators to request gifted access or discuss a paid concept.

Creator FAQ

Which AirPods work?	AirPods 3rd generation, AirPods 4, AirPods 4 with Active Noise Cancellation, AirPods Pro all models, AirPods Max, and Beats Fit Pro.
What Mac do I need?	Apple Silicon Mac running macOS 14 Sonoma or later. Intel Macs are not supported.
Does it use my camera?	No. Posture detection uses only supported AirPods motion sensors.
Does it work offline?	Yes. SitTall - Fix Your Posture makes no network requests and has no cloud component.
Is it paid?	The creator flow is gifted first. Paid collaboration can be discussed if requested.
Do I need to show my face?	No. Screen-led or desk-led content works well for this product.

Trust close

Privacy remains one of the strongest differentiators: no camera, no account, and entirely on-device.
